

Plan and Schedule

The final system will be live by Monday, December 8, 2014

Estimates for each user story can be found in our user stories PDF

Overall Project Estimates

Measured in person/days:

103 person hours of work ~ 26 person days

Including velocity:

147.1 person hours of work ~ 37 person days

Iteration Plan

Iteration 1

October 6- November 2

Iteration 2

November 3- December 7

Completion

December 8

Bottom Line - Can We Do It

Yes, because we have a team of four people that work 10 hours a week for our project. Accounting for a 70% velocity, the hours of work that can be completed within a calendar month is 112 hours. The amount exceeds the person hours of work estimate for the project. Therefore, it is reasonable to expect that we will finish it by December 8th.
